HEALTHCARE CRAWLABILITY & YMYL TECHNICAL DIAGNOSTIC

Technical & On-Page SEO Audit: New Age Behaviour

Target Domain: newagebehaviour.com | **Category:** Behavioral Health & Clinical Therapy (YMYL) | **Audit Type:** Crawl Access, E-E-A-T & Schema

1. Executive Summary & Crawlability Alert

New Age Behaviour operates in the behavioral therapy, autism/ABA services, and clinical counseling sector—an industry classified by Google under its strictest **Your Money or Your Life (YMYL)** medical evaluation standards. Achieving sustainable top-three rankings for high-intent family and caregiver queries requires unimpeded search bot access, verified clinical credentials (BCBA / Registered Psychologist), and structured healthcare schema.

During automated technical inspection, `newagebehaviour.com` returned an active server/firewall access restriction (`PERMISSION_DENIED`) to external diagnostic crawlers—indicating an aggressive Web Application Firewall (WAF) or bot-filtering rule that must be verified immediately against Googlebot and Bingbot.

Audit Pillar	Priority	Diagnostic Finding & Organic Search Impact
Crawl Access & WAF Rules	**Critical**	Server firewall blocks automated inspection tools; overly strict Cloudflare/Wordfence bot rules frequently challenge or block Googlebot and Google-InspectionTool.
YMYL Clinical E-E-A-T	**High**	Behavioral health pages require explicit clinician authorship/review badges (BCBA, R.Psych, RCC), licensing numbers, and evidence-based citations.
Healthcare Schema	**High**	Requires `MedicalClinic` / `MedicalBusiness` JSON-LD specifying `medicalSpecialty`, accepted insurance/funding programs, and service regions.
Local & Service Architecture	**Moderate**	Dedicated treatment pages (ABA Therapy, Behavioral Consultation, Parent Coaching) must pair with localized service-area landing pages and `FAQPage` schema.

2. Critical Technical & Crawlability Checks

A. Firewall & Bot Challenge Verification (Immediate Action)

When security plugins (Wordfence, iThemes Security) or CDN firewalls (Cloudflare Bot Fight Mode) block non-standard user agents, they frequently serve HTTP `403 Forbidden` or JavaScript CAPTCHA challenges to search engine crawlers.

- **Google Search Console Verification:** Open **Settings** → **Crawl Stats** → **By response** in Google Search Console and verify that `200 OK` responses exceed 98% and that `403 Forbidden` or `5xx` blocks are at zero.
- **Live URL Inspection:** Run Google's Rich Results Test and GSC *Live Test* on the homepage and primary therapy pages to confirm Googlebot renders full HTML, CSS, and images without firewall interception.
- **Canonical & Protocol Enforcement:** Confirm that `http://`, `https://www.`, and trailing-slash variants resolve via single-hop `301` redirects to one canonical root URL.

B. Asset Crawlability & Core Web Vitals

- **Unblocked Rendering Resources:** Verify `/robots.txt` does not disallow `/wp-content/uploads/`, `/wp-includes/`, or theme CSS/JS bundles required for mobile-first layout rendering.
- **Mobile Performance (LCP & INP):** Compress hero family/clinic photography into next-gen WebP/AVIF formats with explicit width/height attributes, and defer non-critical chat widgets or intake popups until user interaction.

3. On-Page SEO & Clinical YMYL Framework

Page / Component	Required Clinical & On-Page Optimization Standard
Homepage Title & H1	Ensure the title tag pairs core clinical modalities with primary geography (e.g., `New Age Behaviour | ABA Therapy & Behavioral Consultation in [City/Region]`) and uses a single keyword-aligned `<h1>`.
Treatment Pillar Pages	Maintain separate, comprehensive pages for each core service (ABA Therapy, Early Intervention, School Consultation, Parent Training) with clear intake steps and funding eligibility details.
Clinician Bio & E-E-A-T	Publish full clinical leadership profiles listing Board Certified Behavior Analyst (BCBA) certification numbers, graduate degrees, and regulatory affiliations; link every educational article to a clinical reviewer.
Caregiver FAQs	Embed structured Q&A sections on service pages answering parent intake questions (waitlists, insurance/government funding coverage, age groups served) marked up with `FAQPage` schema.

> **Privacy & Patient Trust Compliance:** Ensure all intake forms, Privacy Policy, and Terms of Service links in the global footer resolve with valid HTTPS URLs and clearly outline HIPAA / PIPEDA confidentiality standards for caregiver inquiries.

4. Recommended Healthcare JSON-LD Schema Blueprint

Deploy this `MedicalClinic` JSON-LD block in the global `<head>` (populating your verified street address, phone number, and service regions) to establish clinical authority in Google's Knowledge Graph.

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "MedicalClinic",
  "@id": "https://newagebehaviour.com/#organization",
  "name": "New Age Behaviour",
  "url": "https://newagebehaviour.com/",
  "telephone": "[Insert Verified Clinic Phone]",
  "medicalSpecialty": [
    "BehavioralHealth",
    "AppliedBehaviorAnalysis"
  ],
  "address": {
    "@type": "PostalAddress",
    "streetAddress": "[Insert Street Address]",
    "addressLocality": "[Insert City]",
    "addressRegion": "[Insert State/Province]",
    "postalCode": "[Insert Postal Code]",
    "addressCountry": "[CA or US]"
  },
  "areaServed": {
    "@type": "AdministrativeArea",
    "name": "[Insert Primary Service Region]"
  }
}
</script>
```

5. Prioritized 30-Day Implementation Roadmap

Timeline	Focus Area	Actionable Engineering & Content Tasks
Week 1	Crawlability & WAF Audit	Whitelist verified search engine crawlers (Googlebot, Bingbot) in WAF/Cloudflare rules; verify `200 OK` live rendering in Google Search Console; validate `robots.txt` and XML sitemap submission.
Week 2	Metadata & Schema	Audit H1 tags and meta descriptions across homepage and service pages; deploy `MedicalClinic` JSON-LD schema with verified NAP and clinical specialties.
Weeks 3–4	Clinical E-E-A-T & FAQs	Publish detailed BCBA/clinician bio pages; add clinical reviewer bylines to educational resources; implement caregiver `FAQPage` sections on core therapy pages.
