HEALTHCARE & LOCAL SEO DIAGNOSTIC REPORT

Technical & On-Page SEO Audit: Revamp Wellness

Target Domain: revampwellness.ca | **Locations:** Langley & Cloverdale (Surrey), BC | **Category:** YMYL Medical & Rehabilitation

1. Executive Summary & Architecture Overview

Revamp Wellness operates two multidisciplinary rehabilitation clinics in British Columbia's Fraser Valley (Langley and Cloverdale/Surrey), offering Registered Massage Therapy (RMT), Physiotherapy, Chiropractic Care, Kinesiology, Acupuncture, and ICBC / WorkSafeBC active rehabilitation. Because clinical treatment falls under Google's **Your Money or Your Life (YMYL)** quality threshold, organic visibility depends on verified clinician credentials (E-E-A-T), dual-location entity schema, and friction-free mobile UX.

While the site has strong conversion copy and clear service hierarchies, key growth barriers include single-city homepage title bias, slogan-driven H1 tags, an intrusive mobile clinic-selector modal, and unlinked practitioner authorship on medical blog articles.

Audit Pillar	Severity	Diagnostic Finding & Search Impact
Local Multi-Clinic SEO	**High**	Homepage title targets *Langley* exclusively, suppressing Cloverdale/Surrey rankings; lacks dual-entity `MedicalClinic` JSON-LD schema.
Mobile UX & Core Web Vitals	**High**	Immediate clinic-selector popup risks Google's Mobile Intrusive Interstitial penalty; synchronous Instagram widget degrades LCP and CLS.
On-Page Semantics	**Moderate**	Homepage H1 (*"Move without limits"*) prioritizes brand tagline over core treatment and regional keywords; ICBC/WSBC pages need FAQ schema.
YMYL & E-E-A-T Signals	**Moderate**	Blog articles name practitioners (e.g., Sabeeh Rehman, Jake Baker) without hyperlinking to credentialed practitioner bio pages.

2. Technical & Mobile UX Findings

A. Intrusive Mobile Interstitial & Location Modal

Upon initial page load, visitors encounter a modal prompt (*"Welcome to Revamp Wellness — Please select your nearest clinic"*). Under Google's Mobile-First Indexing and Page Experience guidelines, full-screen popups that obscure primary content immediately upon entry can trigger ranking demotions.

- **Remediation:** Convert the full-screen clinic selector into a compact, dismissible top or bottom sticky bar on mobile viewports, and ensure both `/locations/langley/` and `/locations/cloverdale/` exist as standalone, indexable URLs rather than JavaScript-gated views.

B. Third-Party Script Blocking (Instagram Feed Widget)

The homepage loads an embedded Instagram feed (*"8 new posts loaded"*) synchronously, introducing third-party JavaScript execution overhead and Cumulative Layout Shift (CLS) as images resize.

- **Remediation:** Defer or lazy-load the Instagram widget using IntersectionObserver so scripts execute only when a visitor scrolls toward the footer, and reserve explicit aspect-ratio containers to eliminate layout shifts.

3. On-Page SEO & YMYL E-E-A-T Optimization

Element / Page	Current State	Recommended Optimization
Homepage Title Tag	`Revamp Wellness Langley | RMT, Massage, Physio & Wellness`	Include both clinics on the root domain: `Revamp Wellness | RMT, Physio & Chiro in Langley & Cloverdale`.
Homepage H1 Tag	`Move without limits`	Update H1 to `Multidisciplinary Physiotherapy, RMT & Chiropractic Clinic in Langley & Cloverdale` (retain tagline as subheading).
ICBC & WorkSafeBC Pages	Mentions direct billing for ICBC and WSBC claims.	Build dedicated local landing pages with `FAQPage` schema answering BC patient queries (e.g., doctor referral rules, active rehab coverage).
Blog Authorship & Links	Posts credit clinicians by name without bio hyperlinks or commercial anchor links.	Link practitioner bylines directly to credentialed bios (CPTBC, CMTBC, CCBC) and add contextual internal links to core service pages.

> **Regulatory Trust Elevation (E-E-A-T):** Display regulatory college affiliations (College of Physical Therapists of BC, College of Complementary Health Professionals of BC) and sports medicine partnerships prominently near primary service CTAs rather than exclusively in the footer.

4. Recommended Dual-Location JSON-LD Medical Schema

Deploy this `@graph` JSON-LD block in the global `<head>` to define both physical clinics as distinct `MedicalClinic` entities with exact addresses, phone lines, and specialties.

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "MedicalClinic",
      "@id": "https://www.revampwellness.ca/#langley",
      "name": "Revamp Wellness Langley",
      "url": "https://www.revampwellness.ca/",
      "telephone": "+1-604-533-0096",
      "address": {
        "@type": "PostalAddress",
        "streetAddress": "8029 199 St Unit 120",
        "addressLocality": "Langley",
        "addressRegion": "BC",
        "postalCode": "V2Y 0E2",
        "addressCountry": "CA"
      },
      "medicalSpecialty": ["Physiotherapy", "Chiropractic", "MassageTherapy"],
      "priceRange": "$$"
    },
    {
      "@type": "MedicalClinic",
      "@id": "https://www.revampwellness.ca/#cloverdale",
      "name": "Revamp Wellness Cloverdale",
      "url": "https://www.revampwellness.ca/",
      "telephone": "+1-604-372-0050",
      "address": {
        "@type": "PostalAddress",
        "streetAddress": "17392 57 Ave #101",
        "addressLocality": "Surrey",
        "addressRegion": "BC",
        "postalCode": "V3S 1G6",
        "addressCountry": "CA"
      },
      "medicalSpecialty": ["Physiotherapy", "Chiropractic", "MassageTherapy"],
      "priceRange": "$$"
    }
  ]
}
</script>
```

5. Prioritized 30-Day Implementation Roadmap

Timeline	Focus Area	Actionable Engineering & Content Tasks
Week 1	Metadata, H1 & Schema	Update homepage title tag and H1 to cover both Langley and Cloverdale; inject the dual-location `MedicalClinic` JSON-LD schema into the site header.
Week 2	Mobile UX & Speed	Replace the full-screen clinic selector modal on mobile with a non-intrusive sticky bar; lazy-load the homepage Instagram feed to improve LCP and CLS.
Weeks 3–4	Location Silos & E-E-A-T	Ensure standalone indexable URLs for Langley and Cloverdale; link blog author bylines to credentialed clinician bios; add `FAQPage` schema to ICBC and WSBC pages.
