COMPREHENSIVE WEBSITE & SEARCH DIAGNOSTIC

Technical & On-Page SEO Audit: Tavola Creative

Target Domain: tavolacreative.com | **Platform:** WordPress + Elementor | **Primary Markets:** Chicago, IL & Kansas City

1. Executive Summary & Core Architecture

Tavola Creative operates on a WordPress and Elementor stack following the rebrand and acquisition of *West Peak Collective* by Tavola Group. The website features a flat, logical URL hierarchy across core service verticals (`/social-media-services/` , `/web-design-services/` , `/paid-ads-services/` , and `/branding/`), dedicated regional landing pages for Chicago and Kansas City, and an editorial `/blogs/` hub.

While brand positioning and visual design are strong, technical inspection reveals recurring Elementor markup bloat, broken footer anchor attributes, duplicate heading structures on archive templates, and conflicting local Name, Address, Phone (NAP) signals that restrict organic rankings and Core Web Vitals performance.

Audit Pillar	Status	Primary Finding & Organic Search Impact
Technical & Core Web Vitals	**High Priority**	27 separate CSS stylesheets and 5 Google Font families (90+ font-weight variants) slow mobile rendering; triple-duplicated `<nav>` DOM nodes inflate page weight.
Crawlability & Site Links	**Critical**	Footer Privacy Policy, Terms & Conditions, and social icons contain empty `<a>` tags without `href` targets; phone anchor outputs `about:invalid#zCSafez` .
On-Page Semantics	**Needs Work**	Blog archive wraps category labels (including `Uncategorized`) in `<h2>` tags and repeats the exact same 5 posts twice; service counters render as static `0` s.
Local SEO & Rebrand	**Moderate**	Footer mixes a physical North Ave office with a PMB virtual mailbox; legacy *West Peak Collective* entity needs formal `sameAs` and `alternateName` schema linkage.

2. Critical Technical & Structural Issues

A. Duplicate DOM Navigation & Elementor Asset Bloat

The rendered HTML contains three separate `<nav>` elements across desktop and mobile header wrappers alongside a duplicated footer navigation list. On internal templates such as `/blogs/` , Elementor loads 27 individual external CSS files plus five Google Font families (`Roboto` , `Roboto Slab` , `Montserrat` , `Glory` , and `Outfit`) requesting every weight from `100` to `900` in normal and italic styles.

- **Performance Impact:** Excessive render-blocking stylesheets and font requests degrade Largest Contentful Paint (LCP) and Total Blocking Time (TBT) on mobile connections.
- **Remediation:** Consolidate typography to two font families (maximum three weights each) hosted locally in WOFF2 format, enable Elementor's Optimized DOM Output and Improved CSS Loading, and remove duplicate footer menu blocks.

B. Broken Footer Anchor Tags & Invalid Telephone Markup

Global footer inspection uncovered multiple non-functional links across sitewide templates:

- **Empty Legal & Social Anchors:** The *Privacy Policy* and *Terms and Conditions* labels render inside `<a><span>...</span></a>` tags without `href` attributes. Bottom social icons for Twitter and YouTube also lack `href` destinations, contradicting the upper footer icons linking to Facebook and Instagram.
- **Invalid Phone Protocol:** The telephone icon link outputs `href="about:invalid#zCSafez"` rather than a valid `tel:` URI.
- **Remediation:** Assign valid URLs (`/privacy-policy/` , `/terms-and-conditions/`), standardize social profile links across all footer widgets, and update the phone link to `<a href="tel:+18479251489">847-925-1489</a>` .

C. Blog Archive Heading Pollution & Duplicate Loop

On `/blogs/` , every post card wraps both the category badge (such as `Marketing Strategy` , `Case Study` , or `Uncategorized`) and the article title in `<h2>` tags. Because the featured section and the "Latest Articles" grid display the exact same five posts back-to-back, the page outputs 20 `<h2>` tags for five articles.

- **Remediation:** Convert category badges from `<h2>` to `<span>` elements, demote archive card titles to `<h3>` , replace the `Uncategorized` taxonomy with a descriptive category, and exclude featured posts from the lower feed query.

D. Post-Rebrand Entity Consolidation (West Peak Collective)

The global top announcement bar states *"West Peak Collective is now Tavola Creative."* During a brand transition, failing to consolidate legacy URLs and directory citations splits historical domain authority and local pack signals.

- **Remediation:** Audit all legacy West Peak Collective URLs to confirm 1:1 `301` redirects to their exact Tavola Creative equivalents, update Google Business Profile and directory citations (Clutch, Yelp, LinkedIn), and connect both names via JSON-LD `Organization` schema.

3. Page-Level On-Page & Content Audit

Targeted adjustments across core landing pages will align visible copy, metadata, and image attributes with commercial search intent.

Page URL	Current Title Tag	Diagnostic Findings & Recommended Updates
`/` (Homepage)	Tavola Creative | Digital Marketing & Branding Agency	Update title to `Tavola Creative | Digital Marketing, Web Design & Branding Agency`. Pair the H1 (*Your Creative Partner in Digital Marketing*) with a keyword-rich subheading referencing Web Design, Paid Ads, Social Media, and Chicago/Kansas City service areas.
`/web-design-services/`	Website Design Services | Custom Web Design Tavola Creative	Strong title tag, but animated counter widgets render static zeroes in HTML (`0 service offerings` , `0 stage process` , `0% Flexible project scope`). Configure initial static HTML values to display `9` , `9` , and `100%` for search crawlers.
`/location/digital-marketing-agency-chicago/`	Digital Marketing Agency Chicago | Tavola Creative	Fix lowercase eyebrow typo (`Serving Business in chicago` to `Serving Businesses in Chicago`). Align contact form location dropdown options (currently listing New York, California, Texas, and Phoenix) with actual served regions.
`/location/digital-marketing-agency-kansas-city/`	Digital Marketing Agency Kansas City | Tavola Creative	Footer link anchor reads `Kansas` (state) and eyebrow reads `Serving Business in Kansas` , diluting relevance for *Kansas City*. Update footer anchor text to `Kansas City` and fix image alt typo (`Social Media Comapign heor`).
`/blogs/` (Blog Hub)	Blogs | Tavola Creative	Three of five featured images have empty `alt` attributes, and the Instagram wellness case study thumbnail carries `alt="WordPress"` . Add descriptive, keyword-aligned alt text to all media assets.

> **Content Architecture Gap — Missing Dedicated SEO Service Page:** Both the Homepage and the Web Design service page actively promote Search Engine Optimization as a core agency offering, yet the navigation and URL tree contain only four service pillars (Social Media, Web Design, Paid Ads, and Branding). Creating a dedicated `/seo-services/` landing page will capture high-intent agency queries and establish an internal linking target for existing SEO blog articles.

4. Local SEO & NAP Consistency

Consistent Name, Address, and Phone (NAP) data is essential for local pack visibility in Chicago and regional expansion into Kansas City.

- **Conflicting Chicago Street Addresses:** The footer displays both an Office Address (`939 W North Ave, Suite 750, Chicago, IL 60642`) and a Mailing Address (`2045 W Grand Ave, Suite B, PMB 28197, Chicago, IL 60612-1577`), whereas the contact form sidebar displays only the Private Mailbox (PMB). Google's local guidelines discourage listing virtual mailboxes or PMBs on public pages, as dual addresses fragment local entity signals.
- **Standardization Action:** Remove the `2045 W Grand Ave PMB 28197` address from all public templates so `939 W North Ave, Suite 750, Chicago, IL 60642` serves as the sole indexed address matching your verified Google Business Profile.
- **Kansas City Positioning:** If Tavola Creative maintains a staffed physical office in Kansas City, publish its verified local address and phone number on `/location/digital-marketing-agency-kansas-city/`. If Kansas City is served remotely from Chicago, explicitly frame the page as a regional service-area page without a virtual mailbox.

5. Recommended JSON-LD Entity & Local Schema

Deploy the following structured data in the global `<head>` to formally connect **Tavola Creative** with its legacy identity (**West Peak Collective**), verified Chicago headquarters, and regional service areas.

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "ProfessionalService",
  "@id": "https://www.tavolacreative.com/#organization",
  "name": "Tavola Creative",
  "alternateName": "West Peak Collective",
  "url": "https://www.tavolacreative.com/",
  "telephone": "+1-847-925-1489",
  "priceRange": "$$$",
  "address": {
    "@type": "PostalAddress",
    "streetAddress": "939 W North Ave, Suite 750",

6. Prioritized 30-Day Implementation Roadmap

Timeline	Focus Area	Actionable Engineering & Content Tasks
Week 1	Crawlability, Trust & NAP Cleanup	Add valid `href` URLs to footer Privacy Policy, Terms & Conditions, social icons, and `tel:+18479251489`; remove the `PMB 28197` mailing address from public templates; fix static `0` counters on `/web-design-services/` and regional typos (`Kansas City`, `Chicago`).

Timeline	Focus Area	Actionable Engineering & Content Tasks
Week 2	Core Web Vitals & Elementor Optimization	Consolidate Google Fonts from 5 families to 2 locally hosted WOFF2 families; enable Elementor CSS/DOM optimization to merge the 27 stylesheets; eliminate duplicate header/footer `<nav>` blocks.
Week 3	Archive Semantics & Media Hygiene	Change `/blogs/` category badges from `<h2>` to `<span>`; demote card titles to `<h3>`; remove duplicate 5-post loop; replace `Uncategorized` taxonomy; populate missing image `alt` attributes and fix `alt="WordPress"`.
Week 4	Schema, Redirects & Pillar Expansion	Deploy the `ProfessionalService` JSON-LD schema; verify 1:1 `301` redirects from legacy West Peak Collective URLs; launch a dedicated `/seo-services/` pillar page linked from blog articles.
